Site is a group of Structures of many differing sizes and shapes; <sup>and</sup> dimensions in general seem quite large in scale. Site is dimensionally complex, involves numerous colors, but especially beated ones such as ~~various shades of grey~~ <sup>grey + white</sup>; roundness is a dimensional characteristic of the site that seems to be of some special significance.

In June of 1981 A large, <sup>grey + white</sup> ~~yellow~~ self-luminous, cold, dead-like formation occurred; this "cloud" covered a very large area in all dimensions, and had greater consistency than the surrounding atmosphere. It seems to "roll into itself," ~~to~~ and to attenuate gradually, though it maintained self-cohesive. It manifested an impersonal, Amotinal EI aspect; . There was a purposeful element involved with it.
